STUDENT  
HOUSING

The Vice President of Student Services or designee has overall responsibility for the students who reside in student housing. The Director of Facilities and Security under the direction of the Vice President for Administration has responsibility for the facilities, the property, and the security of the students living in college housing.

The purposes of college housing include providing a safe and supportive environment where students can learn and develop life skills necessary for both academic and career success. The campus living environment should allow students to develop lasting relationships, experience cultural diversity, and increase social skills as well as complete their academic requirements.

The relationship of resident students to the College including fees, room assignments, hours, rules and regulations, emergency procedures, care of property, and other information is described in the Student Housing Guide.

A signed residence hall contract is required of all students who reside in one of the College's housing units.
